2 million+
customers

Aura Cebilon PRO is used to obtain drinking water from
municipal-treated network water. The water to be
purified must be microbiologically safe and subjected to
the necessary disinfection process.

Aura RO Water Filter VS Jug Filters

Powerful Filtration

99.9% of lead, bacteria, chlorine, microplastics & PFAS removed

Superior Lead Removal

99.9% vs. jug filters' 58.3% - 73.8%

Low Maintenance

One filter change every 6-12 months vs. monthly cartridge replacements

Proven Performance

NSF 58 certified, 2000x more micron power than jug filters

Why Use Water Filtration?

- UK's old water infrastructure increases the risk of contamination through pipes.
- Removes microplastics often found in tap water and bottled water.
- Reduces water hardness — improving taste and protecting appliances.
- NSF-certified materials ensure safe, clean water with no recontamination risk.
